

Special Session Call for Papers

on

Delay/Disruption Tolerant Networks (DTN) in Satellite Communications

at the

**International Conference on Personal Satellite Services 2010
(PSATS'10)**

www.psats.eu

Special Session Co-Chairs

Dr. Haitham Cruickshank (University of Surrey, UK)

A/Prof. Caini Carlo (University of Bologna, Italy)

In the last few years, Delay/Disruption Tolerant Networking (DTN) has grown to a healthy research topic because of its suitability for challenged environments characterized by heterogeneity, long delay paths and unpredictable link disruptions including satellite networks. Papers are invited to the special session Delay/Disruption Tolerant Networks in PSATS'10, in particular papers that address the following:

- Security and key management
- QoS and congestion control
- Multicasting
- Transport layer
- Routing
- DTN implementations

For paper submissions, please visit <http://www.psats.eu/submission.shtml>

Submission Deadline: **10-Oct-2009**

Notification: 30-Nov-2009

Camera Ready: 15-Dec-2009
